

VISHAL YADAV

Full Stack Developer | MERN, FastAPI & RAG-Powered AI Apps

Noida, Sector 47 | 9336191749 | vishalyadav.95055@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science Engineering graduate and full-stack developer skilled in the MERN stack, FastAPI, and Python, with hands-on experience shipping production-style Generative AI systems — LLM integration, Retrieval-Augmented Generation (RAG), and multi-agent workflows with LangGraph. Comfortable owning features end-to-end, from responsive React/Next.js interfaces to secure REST APIs and AI-powered backends, with a strong foundation in clean code and cross-browser, cross-platform reliability. Currently applying this skill set as an AI Full Stack Developer Intern, building FastAPI services for a live SaaS product, and eager to grow further in a fast-paced product team.

TECHNICAL SKILLS

Languages: Python, JavaScript

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, FastAPI, REST APIs, Socket.io

AI / GenAI: LLM Integration, Retrieval-Augmented Generation (RAG), LangGraph, Prompt Engineering, Gemini API

Databases: MongoDB, MySQL, Pinecone (Vector DB), Supabase (pgvector)

Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel, WhatsApp Business API

EXPERIENCE

Full Stack Developer Intern — CogniTensor, Noida

May 2026 – Present

- Build and maintain FastAPI-based backend services powering core navigation modules for the Sustain3P platform.
- Design and implement FastAPI endpoints for User, Admin, and Super Admin roles, with role-based access control across the application.
- Collaborate with product and engineering teams to ship full-stack features end-to-end using Python, FastAPI, and Next.js.

PROJECTS

WhatsApp AI Chatbot with RAG-Based Lead Generation | [GitHub](#)

- Engineered an AI-powered WhatsApp chatbot with Node.js, Express, and the WhatsApp Business API, integrating Google Gemini to automate real-time customer conversations and qualify inbound leads.
- Designed a Retrieval-Augmented Generation (RAG) pipeline — chunking business knowledge-base data, generating embeddings, and storing them in a Pinecone vector database — to power accurate, context-aware AI responses, with qualified leads captured directly into MongoDB.

Umang AI — AI Voice Companion for Elderly Users

- Built a 30-day AI voice companion app for elderly users living alone, using FastAPI, Supabase (pgvector), Gemini 2.5 Flash, Deepgram, and ElevenLabs for natural, multilingual (Hindi-English) conversations.
- Implemented RAG-based knowledge retrieval, text and facial emotion detection, and a D-ID lip-sync avatar, alongside Gmail family alerts and medicine/routine reminders for day-to-day support.

Resume Analyzer with Gemini AI | [GitHub](#)

- Developed a full-stack web application that analyzes resumes via the Gemini AI API, evaluating content against ATS best practices and generating instant, actionable feedback for job seekers.
- Designed an intuitive front-end interface and integrated backend APIs to deliver a smooth, end-to-end resume review experience.

Secure Zoom Clone | [GitHub](#)

- Built a real-time video conferencing web application using Socket.io for low-latency peer-to-peer communication, replicating core Zoom-like functionality.
- Implemented secure user authentication with bcrypt password hashing and a scalable, room-based architecture for isolated meeting sessions.

EDUCATION

B.Tech, Computer Science & Engineering — Rajarshi Rananjay Singh Institute of Management and Technology | CGPA: 7.2 | 2026

Senior Secondary (XII): 62%, 2022 | Secondary (X): 76%, 2020

CERTIFICATIONS

Web Development (Full Stack) certification; currently pursuing AI & Machine Learning, applying Generative AI and automation to real-world web applications.
