PROJECTS

Secure Zoom Clone | [GitHub](#) | [Live Demo](#)

- Built a real-time video conferencing web application using Socket.io for low-latency peer-to-peer communication, replicating core Zoom-like functionality.
- Implemented secure user authentication with bcrypt password hashing to protect user credentials and prevent unauthorized access to meeting rooms.
- Designed a scalable room-based architecture allowing multiple users to join and communicate in real time within isolated meeting sessions.

Resume Analyzer with Gemini AI | [GitHub](#) | [Live Demo](#)

- Developed an AI-powered web application that analyzes uploaded resumes using Google's Gemini AI API and generates instant, actionable feedback.
- Built features to evaluate resume content against ATS best practices, highlighting strengths, gaps, and improvement suggestions for job seekers.
- Designed an intuitive front-end interface and integrated backend APIs to deliver a smooth end-to-end resume review experience.

Personal Portfolio Website | [Live Demo](#)

- Designed and developed a responsive personal portfolio website to showcase projects, skills, and professional profile to recruiters.
